

FTZ & CUSTOMS BONDED SOLUTIONS

When goods are imported or exported from the United States, they are typically stored in either a Free Trade Zone (FTZ) warehouse or a Customs Bonded Warehouse. While both facilities have similarities, they differ in purpose, usage of goods, and storage limitations. Depending on your company's objectives, McLane Global's FTZ and Customs Bonded Warehousing solutions are designed to meet your specific needs.

WHAT ARE THE ADVANTAGES FOR YOUR BUSINESS?

BENEFITS OF FTZ WAREHOUSING

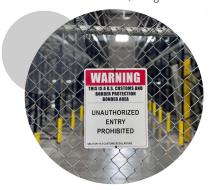

Foreign-Trade Zone (FTZ) Warehousing provides a cost-effective solution for importing goods in the U.S., enabling significant savings in time, energy, and expenses. In FTZs, goods can be imported without incurring duties or taxes until they are consumed or sold domestically. McLane Global's FTZ Warehousing offers flexible leasing options for storing foreign-sourced products and raw materials, with no restrictions on how long items can remain in the zone. This approach also streamlines logistics and enhances inventory control.

- **DUTY DEFERRAL**
- ✓ INVENTORY FLEXIBILITY
- TAX EXEMPTIONS
- SIMPLIFIED IMPORT/EXPORT
- COST SAVINGS ON CUSTOMS
- MANUFACTURING BENEFITS
- FLEXIBILITY IN CARGO MANAGEMENT
- OPERATIONAL FREEDOM
- ✓ REDUCED REGULATORY COMPLEXITY

BENEFITS OF CUSTOMS BONDED WAREHOUSING

When selecting a Customs Bonded Warehouse, reliability and security are key. McLane Global provides tailored services at strategically located facilities, ensuring compliance with customs requirements. We offer specialized storage to defer duties and taxes until products leave the warehouse, along with enhanced security, flexible inventory management, improved cash flow, and reduced penalty risks.
